

Einsteins Miraculous Year Five Papers That Changed the Face of Physics

Filesize: 1.24 MB

Reviews

This pdf will not be simple to start on reading through but extremely enjoyable to see. I have read and i also am sure that i will planning to read through again once more in the foreseeable future. You wont really feel monotony at whenever you want of the time (that's what catalogues are for relating to if you request me).

EINSTEINS MIRACULOUS YEAR FIVE PAPERS THAT CHANGED THE FACE OF PHYSICS

To get **Einsteins Miraculous Year Five Papers That Changed the Face of Physics** PDF, remember to click the web link beneath and download the file or have accessibility to other information which might be related to EINSTEINS MIRACULOUS YEAR FIVE PAPERS THAT CHANGED THE FACE OF PHYSICS ebook.

Princeton University Press. Paperback. Condition: New. 272 pages. Dimensions: 8.3in. x 5.4in. x 0.7in. After 1905, Einsteins miraculous year, physics would never be the same again. In those twelve months, Einstein shattered many cherished scientific beliefs with five extraordinary papers that would establish him as the worlds leading physicist. This book brings those papers together in an accessible format. The best-known papers are the two that founded special relativity: *On the Electrodynamics of Moving Bodies* and *Does the Inertia of a Body Depend on Its Energy Content*. In the former, Einstein showed that absolute time had to be replaced by a new absolute: the speed of light. In the second, he asserted the equivalence of mass and energy, which would lead to the famous formula $E = mc^2$. The book also includes *On a Heuristic Point of View Concerning the Production and Transformation of Light*, in which Einstein challenged the wave theory of light, suggesting that light could also be regarded as a collection of particles. This helped to open the door to a whole new world--that of quantum physics. For ideas in this paper, he won the Nobel Prize in 1921. The fourth paper also led to a Nobel Prize, although for another scientist, Jean Perrin. *On the Movement of Small Particles Suspended in Stationary Liquids Required by the Molecular-Kinetic Theory of Heat* concerns the Brownian motion of such particles. With profound insight, Einstein blended ideas from kinetic theory and classical hydrodynamics to derive an equation for the mean free path of such particles as a function of the time, which Perrin confirmed experimentally. The fifth paper, *A New Determination of Molecular Dimensions*, was Einsteins doctoral dissertation, and remains among his most cited articles. It shows how to calculate Avogadros number and the size of molecules. These papers, presented in...
