Brand New Book ***** Print on Demand *****.The National Institutes of Health Publication 07-4051, Guidelines for the Diagnosis and Management of Asthma, The EPR--3 Summary Report 2007, provides key information from the full report on the diagnosis and management of asthma. Summary information is provided on measures of assessment and monitoring, education for a partnership in asthma care, control of environmental factors and comorbid conditions that affect asthma, and medications. Key tables and figures from the full report are included for easy reference. Asthma is a chronic inflammatory disease of the airways. In the United States, asthma affects more than 22 million persons. It is one of the most common chronic diseases of childhood, affecting more than 6 million children (current asthma prevalence, National Health Interview Survey (NHIS), National Center for Health Statistics, Centers for Disease Control and Prevention, 2005) (NHIS 2005). There have been important gains since the release of the first National Asthma Education and Prevention Program (NAEPP) clinical practice guidelines in 1991. For example, the number of deaths due to asthma has declined, even in the face of an increasing prevalence of the disease...
