Imperial College Press, United Kingdom, 1998. Hardback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. This book is concerned with imaging of the interior of the human body using signals originating from magnetic moments of hydrogen nuclei and detected using a technique known as magnetic resonance. It explains the method and gives examples of applications. The book is addressed to those who would like to understand the principle of the method exactly, but do not have university training in physics and mathematics. It will therefore be very useful to medical practitioners and researchers, radiologists, and auxiliary workers in the health service.
