Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | **METAL INDUCED ALTERATIONS IN FRESH WATER PRAWNS** | Literature survey clearly indicates that fresh water prawns, despite being important member of food chain, good bio-indicator and having high economical value, have not been properly studied in relation to metal toxicity. Considering economical and good bio-indicator value of fresh water prawns, present work has been taken into account to evaluate behavioural, haematological and histopathological effects of mercuric chloride and nickel chloride on *Macrobrachium lamarrei* and *Macrobrachium dayanum*, prawn species, abundantly available in Lucknow. The research work incorporated in present thesis is represented in three sections. Section-I deals with bioassay experiments; Section-II deals with behavioural, haematological and histopathological effects of mercuric chloride while Section-III deals with behavioural haematological and histopathological effects of nickel chloride on fresh water prawns, *Macrobrachium lamarrei* and *Macrobrachium dayanum*, good bio-indicators and potential animals for fresh water aquaculture. | Format: Paperback | Language/Sprache: english | 412 pp.
