## PRODUCTION ET ETUDE DE LASERS A ATOMES GUIDES

Editions Universitaires Europeennes. Paperback. Condition: New. 180 pages. Dimensions: 8.7in. x 5.9in. x 0.4in. Dans ce mmoire de thse, nous prsentons dune part un nouveau dispositif experimental permettant lobtention de condensats de Bose-Einstein de rubidium dans un pige dipolaire crois, et dautre part des experiences de production et de manipulation de lasers atomes guides optiquement partir de ces condensats. Le potentiel optique utilis pour piger les atomes est independant du sous- niveau de ltat fondamental dans lequel ils se trouvent. Nous mettons profit cette particularit pour contrler leur tat interne par une mthode de distillation du spin en appliquant des gradients de champ magntique pendant la phase dvaporation. Nous exposons ensuite deux nouvelles mthodes pour produire des lasers atomes guides partir de ces condensats, lune optique, lautre magntique, bases sur le dversement progressif des atomes hors du pige crois o ils sont prpars dans un guide optique. Nous caractrisons le degr doccupation des modes transverses du guide pour les lasers atomes produits, ainsi que la qualit du dcouplage en terme dentropie cre, grce une analyse thermodynamique. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
