INTRODUCTION TO SPECTRAL THEORY AND INVERSE PROBLEM ON ASYMPTOTICALLY HYPERBOLIC MANIFOLDS (PAPERBACK)

Mathematical Society of Japan, Japan, 2014. Paperback. Condition: New. Language: English . Brand New Book. This manuscript is devoted to a rigorous and detailed exposition of the spectral theory and associated forward and inverse scattering problems for the Laplace-Beltrami operators on asymptotically hyperbolic manifolds. Based upon the classical stationary scattering theory in \mathbb{R}^n , the key point of the approach is the generalized Fourier transform, which serves as the basic tool to introduce and analyse the time-dependent wave operators and...
